

The Computer Science & Engineering Department of Chandigarh College of Engineering & Technology (Diploma Wing), Chandigarh, successfully organized the Internal Hackathon on 9th September 2024, as part of the prestigious nationwide initiative, Smart India Hackathon (SIH). This initiative, championed by Hon'ble Prime Minister, aims to engage students in addressing real-world challenges by bridging the gap between academic knowledge and practical application.

The event was graced by Sh. Madan Lal Rana, Principal of CCET (Diploma Wing) along with Heads of Departments, President Student Council and faculty members, who inspired and encouraged students to actively participate in SIH 2024. Dr. Sunita Mehta, Head of the CSE Department, provided an insightful briefing on the objectives and vision of SIH 2024, emphasizing its significance in fostering innovation and problem-solving among young minds.

A total of 30 enthusiastic students from the CSE and ECE departments showcased their creativity, teamwork, and problem-solving prowess. Their dedication and passion were evident as they worked collaboratively, demonstrating a commitment to innovation and excellence. Mr. Ayush Chugh and his team bagged first position and Mr. Shreyas Vaishya and his team got second position. The winning teams will be awarded with Cash prizes. The internal Hackathon served as a platform for these budding engineers to hone their skills and prepare for the national-level SIH 2024 competition.
